

Easy Roller Service Westland

KOMORIKare

Use of the right rollers ensures a stable printing process, less waste and roller changes and is therefore, a profitability boost. KomoriKare Easy Roller Service supports printers by offering complete new sets of excellent dampening and ink rollers. At request, an experienced Komori print specialist will visit production sites to remove old rollers, before installing and setting the new ones.

All rollers in the 6 sets are developed by Westland in conjunction with Komori and tested in Komori Graphic Center-Europe. Printers can rely on rollers that are the high-quality results of combining the skills and expertise of two world-class organisations and will help them to get the most out of their Komori printing press.

Suitable for

- Lithrone G29 conventional and H-UV printing presses.
- Lithrone G37 conventional and H-UV printing presses.
- Lithrone G40 conventional and H-UV printing presses.

Benefits

- Installation will be done by a Komori print specialist.
- New OEM specific rollers, including new cores.
- The rollers are suitable for a wide range of applications.
- Attractive pricing (offer).
- Free of transport costs.*
